StartNet.

Inputs we need from StartNet.

Everything the startnet.in website still needs from the StartNet team: facts, legal texts, people, data, sign-offs and decisions. Until each one is supplied, the site shows a visible placeholder and never makes the value up.

Website
startnet.in (React + NestJS), English and Tamil

Status
Built, audited, SEO / AEO / GEO done

Date
8 October 2026

1 At a glance

The site is complete: 244 English pages plus 244 Tamil mirrors. What is left is content and decisions that only StartNet can provide. The code holds about 650 placeholder marks, and they fall into the groups below.

14 events with no confirmed date or venue	**20** programmes with open fees, dates or terms	**28** figures without a value or an as-at date	**11** legal texts waiting for counsel
9 brand leads and advisory councils to name	**4** founder stories (with written consent)	**10** reports and indices without a publish date	**98** pages kept out of Google until they have real content

P1 Needed before launch (legal, compliance, or the site would be wrong)

P2 Needed for a strong launch (search ranking, trust, conversions)

P3 Can follow after launch

#	AREA	WHAT WE NEED	PRIORITY
2	Organisation & brand	Legal entity name, CIN, registered address, phone, logo files, social profiles, confirmed email addresses	P1
3	Legal texts	Privacy, terms, cookies, data rights, grievance officer, safeguarding, refunds and others, from counsel	P1
4	Channels & tools	WhatsApp number, where form submissions should go, analytics tool, StartNet X link check	P1
5	Events	Dates, venues, cities, fees, agendas, speakers, jury, and the past-event archive	P1
6	Programmes	Fees, cohort dates, eligibility, funding, partner platforms	P1
7	Figures	Outcome numbers with source and as-at date for every figure shown	P2
8	People	Brand leads, advisory councils, bios, photos and naming consent	P2
9	Stories, reports, partners, press, jobs	Consented founder stories, report dates, signed partners with logo permission, releases, roles	P2
10	Districts	Where StartNet is really active (events, Circles, partners), map data licence	P2
11	Search launch (SEO / GEO)	Search Console and Bing access, legacy domains and old URLs, Google Business Profile	P2
12	Tamil	Native-speaker review of all Tamil, and translation of the body copy still in English	P2
13	Copy sign-off	FAQ answers, agent-drafted copy, scheme amounts, wording fixes	P2
14	Decisions	Eight yes / no choices that change site behaviour	P2
15	Hosting	Domain, DNS, server, environment settings	P1

2 Organisation & brand

Shown in the footer, contact page, legal pages and the Organization data that Google and AI engines read.

ITEM	WHERE IT APPEARS	PRIORITY
Registered legal entity name and CIN	Footer, legal pages, Organization structured data	P1
Registered office and Chennai office full address	Contact page, legal pages, Google Business Profile	P1
Grievance officer: name, email and postal address (DPDP Act and IT Rules)	Contact page, privacy, grievance, StartNet X trust page	P1
Phone number(s) for the office	Contact page, structured data	P2
Confirm that these mailboxes exist and are monitored: hello@, media@, partners@, careers@ (all @startnet.in); and supply an investor-relations email	Contact, media, partner and careers pages (currently marked "[confirm]")	P1
Master logo files (vector SVG/EPS) for StartNet and each brand	Header, share images, media kit, structured data logo	P2
Official social profiles (LinkedIn, Instagram, YouTube, X, WhatsApp channel)	Footer and the `sameAs` list, a strong signal for Google and AI engines	P2
Founding year, first event and key milestones with dates	About / "Our story" timeline, "events run since [year]"	P2
CSR implementing entity: StartNet Foundation (CSR-1 number) or a registered partner	Partner → CSR page	P2
Partner enquiry response time (SLA), e.g. "reply within 2 working days"	Partner pages, mega menu	P3
Newsletter frequency (weekly / monthly)	Footer and newsletter page	P3

3 Legal texts (from counsel)

The legal pages exist with structure and headings. The binding text must come from StartNet's lawyers. These are launch blockers: forms collect personal data under the DPDP Act, 2023.

PAGE	WHAT COUNSEL NEEDS TO SUPPLY	PRIORITY
`/legal/privacy`	Full privacy notice; list of data processors and their locations	P1
`/legal/terms`	Website terms of use	P1
`/legal/cookies`	Cookie notice matching the consent banner (essential only by default)	P1
`/legal/data-rights`	How people exercise DPDP rights (access, correction, erasure, nomination)	P1
`/legal/grievance`	Grievance officer details and reporting route	P1
`/legal/safeguarding`	Safeguarding lead, event rules, reporting route (students attend events)	P1
`/legal/refunds`	Refund windows and conditions for paid programmes and tickets	P1
`/legal/code-of-conduct`	Event and community code of conduct	P1
`/legal/sponsorship-terms`	Sponsorship terms (prices follow the published rate card)	P2
`/legal/accessibility`	Results of the accessibility audit and a contact for issues	P2

PAGE	WHAT COUNSEL NEEDS TO SUPPLY	PRIORITY
`/research/terms`	University spinout term sheet. It is marked "draft, publish only after legal review" and hidden from Google until then	P2

4 Channels & tools

ITEM	WHY	PRIORITY
WhatsApp business number (country code + number)	All 165 WhatsApp buttons point to the placeholder `wa.me/910000000000`. We set it as `VITE_WHATSAPP_NUMBER` at build time. Also confirm the bot keywords (e.g. VIBATHON, WOMEN, CONNECT SAAS)	P1
Where form submissions should go: CRM, email inbox or StartNet X	Contact, enquiry, newsletter, join, interest, nomination, host and speak forms are saved to a file on the server today, and nobody gets notified	P1
Analytics tool (Google Analytics 4, Plausible or other) and owner	No analytics is installed. The consent banner already blocks non-essential cookies until accepted	P2
StartNet X deep links: the real sign-up, sign-in and apply paths on x.startnet.in	Every "Apply" and "Join" button deep-links into StartNet X; the paths need checking against the live app	P1
Payment / ticketing route (e.g. Razorpay links, as Book 1 describes)	Paid events and programmes need a working way to pay	P2

5 Events

No event has a confirmed date, so search engines get no event listings yet. Each confirmed date and venue switches on Google's event rich results automatically. For every event we need the **exact dates, venue name and address, city, fee (or "free"), registration link, agenda, speakers** (with consent) and, for awards, the **jury**.

EVENT	CURRENT STATE ON THE SITE	MISSING	PRIORITY
Vibe Campus build nights	December 2026, host colleges to be confirmed	Host colleges, dates per college	P1
Vibathon 2027 · district qualifiers	January 2027	Dates, venues, final fee, registration dates	P1
Vibathon 2027 · state finale	February 2027	Date, venue, city, final fee, team size (2–4 is "[confirm]"), jury	P1
GenAI Connect 2027	May–June 2027	Date, venue, city, fee	P2
SaaS Connect 2027	May–June 2027	Date, venue, city, fee	P2
D2C Connect 2027	May–June 2027	Date, venue, city, fee	P2
Lab-to-Market Summit 2027	August–September 2027	Dates, venue, city, fee	P2
Women Founders Summit & Awards 2027	August–September 2027	Dates, venue, city, fee, jury, award categories	P2
Vibe Summit 2027	October 2027 (page hidden from Google: everything is a placeholder)	Date, venue, city, fee, agenda	P2
Vibathon 2025 (past)	Recap page	Exact dates, venue, final attendance with as-at date, photos	P2

EVENT	CURRENT STATE ON THE SITE	MISSING	PRIORITY
GenAI / D2C / SaaS Connect, Investors Summit (past editions)	Archive pages	Each past edition: date, city, venue, attendance, permitted speakers and sponsors	P2

Biggest search opportunity: Book 1 §9.5 says "five years of events with no public trace" is the largest SEO gap. A spreadsheet of every past edition (name, date, city, co-hosts, attendance, speakers and sponsors with permission) lets us publish an archive page for each one.

6 Programmes

For each programme: **final fee** (or confirm free / sponsored), **next cohort or application dates**, **eligibility**, **duration and format**, and who funds sponsored seats. Indicative prices tagged C stay visible but are never shown to search engines as real prices.

PROGRAMME	WHAT IS OPEN	PRIORITY
Vibathon	Final fee per team (free to ₹499 is indicative); are recent graduates eligible?	P1
Vibe Launchpad	Funding for the sponsored 12-week pre-incubation; cohort dates	P1
Scholar Founders Fellowship	Cohort dates; sponsor- or grant-funded seats; eligibility	P1
Founder Switch	Cohort dates; price (indicative ₹35,000–75,000); format "Chennai in person + online" to confirm	P1
Rise Academy	CSR-subsidised fee (indicative ₹5,000–15,000); cohort dates	P1
HerCapital	Rate card	P2
StartNet Angels	Partner platform or fund; how investors join	P2
Lab-to-Market Summit, Women Founders Summit, Vibe Summit	Dates and fees (same as events)	P2
Connect Series (9 sectors)	"Running since [year]" for each sector; which sectors are live (6 are hidden from Google until they run)	P2
Vibe Academy, Connect Circles, Scale Connect, Institution Partner Programme, Women Circles, Grant Desk	Confirm fees and status shown on the page	P2
StartNet X pricing	Confirm SNX Pro ₹499/month (indicative) and the GST rate (18% is "[confirm rate]")	P2

7 Figures (with source and as-at date)

Every number on the site carries a confidence tag (A: system record, B: verified external source, C: plan or estimate), an

as-at date and a source. We cannot publish a figure without all three.

Values to supply (22)

MASTERBRAND	BRANDS
• Founders nurtured (L2+) to date • Mission 1 Lakh progress • Events run since [year] • Colleges and institutions worked with • Startups launched (L5) • Capital raised by StartNet founders • Pilots and contracts signed • Share of participants who are women • Districts with active programmes	• Research: partner institutions, Scholar Founders Fellows, companies formed • Vibe: colleges active, Vibathon 2025 participants, Launchpad teams • Connect: events run, total attendees, Circle members, capital raised • Women: Circles active, Rise Academy graduates, capital raised through HerCapital

Values present, but source and as-at date missing (6)

- 80% of colleges reached by Vibathon 2025 were Tier 3 or 4 · Vibathon 2025 prize pool ₹2.5 L
- Tamil Nadu higher-education GER 52.3 ("the highest in India") · 30,000 PhD enrolments
- TANSEED up to ₹15 L for women-led startups · TIIC Vetri Magalir loans ₹10 L to ₹5 Cr: please verify the current scheme amounts

Also needed: Founder Ledger edition dates and district counts, and the first edition date of each report.

8 People

WHO	WHAT WE NEED	PRIORITY
Leadership: M K Elango, Dr V. Nagaraj, Poonthamil	Confirm names and titles; short bios; photos; LinkedIn links; each person's Tamil name spelling	P2
Brand leads (5): Research, Vibe, Connect, Women, StartNet X product	Name, role, short bio, photo, consent to be named	P2
Advisory councils (4): Research, Vibe, Connect, Women	Members, with consent to be named	P2
Speakers, mentors and juries	Per event, with consent	P3

9 Stories, reports, partners, press and jobs

ITEM	WHAT WE NEED	PRIORITY
Founder stories (4 slots)	Real founder stories with the founder's **written consent**: name, photo, what they built, which programme. These are the best content for both Google and AI answers. Today the 4 slots are hidden from Google	P2
Signed partners and sponsors	Only partners with a **signed agreement and logo permission** are shown. List with name, logo, agreement date, type	P2
Reports and indices (10)	Publish dates and files: Founder Ledger, TN Founder Report 2027, Founder Readiness, Campus Innovation, Research Commercialisation, TN Women Founders Report, State of TN SaaS / GenAI / D2C, annual self-diagnosis; sponsor for any sponsored report	P3
Press releases and media coverage	Past releases and coverage links for the media centre	P3
Open roles	Job descriptions (each becomes a Google for Jobs listing)	P3

ITEM	WHAT WE NEED	PRIORITY
Event and team photos	Photos with permission (the site uses generative art until then)	P3

10 Districts

All 38 district pages are built but hidden from Google, because Book 1 §9.3 allows a district page only where there is **real activity**, to avoid thin "doorway" pages. Please send, per district: the **events held or planned** (with city and venue), **active Circles**, and **signed local partners**. Each district with real activity becomes indexable automatically.

Also needed: the source and licence of the district boundary data for the map, and the regional office addresses (if any) for Google Business Profiles.

11 Search launch (SEO / GEO)

ITEM	WHAT WE NEED FROM STARTNET	PRIORITY
Google Search Console + Bing Webmaster Tools	Access to the DNS (TXT record) for `startnet.in`, or an admin who can verify it. Bing also powers ChatGPT search and Copilot	P1
Legacy domains	Confirm ownership of startnetresearch.in, startnetvibe.in / .com, startnetconnect.in, startnetwomen.in, startnetx.in, snxone.in, snx.one, vibathon.in so each redirects (301) to the new pages	P1
Old URLs with traffic	Server logs or analytics exports of the current sites, so every old page with backlinks gets a redirect (Book 1 lists this as a placeholder)	P1
Google Business Profile	Create or claim it for the Chennai office (same name, address and phone as the site)	P2
Keyword volumes	Access to a keyword tool (Google Ads Keyword Planner, Ahrefs or Semrush) to validate the English and Tamil keyword choices	P3
Links and listings	Introductions for listings and links from StartupTN, partner colleges, TiE chapters, government portals and the press	P3

12 Tamil

- **Native review of all Tamil.** Every Tamil string written for this build, including all Tamil page titles and descriptions (marked `SEO-TA: pending native review`), the `…Ta` fields in the data files and the consent banner.
- **Translation of body copy** that is still English on `/ta` pages (correctly marked as English for now).
- **Tamil keyword validation** with search-volume data (Book 1 §9.2 says the Tamil terms are starting points).
- Each named person confirms the Tamil spelling of their own name.

13 Copy sign-off

- **FAQ answers** added for search and AI answer engines on Home, About, Brands, the four brand homes, Programmes, Events, StartNet X and Partner. They restate the books, but each needs StartNet approval. In particular, "Is it free to join StartNet? Yes, for individuals."
- **Copy written where the books had none**: some FAQ answers and headings, the "Sponsor a Lab" block, the Tamil 404 lines, and the short descriptions per programme and series (e.g. "research demo summit" for Lab-to-Market).
- **HerCapital** names TANSEED and TIIC Vetri Magalir with amounts; please verify against the current schemes.
- **Wording fix in the data**: the TN Women Founders Report and the TN Research Commercialisation Index say "Launched at" although they are not out yet. Confirm the intended wording.
- **Placeholder founder stories**: keep the 4 placeholder story pages live (hidden from Google) or remove them until real stories exist?

14 Decisions

QUESTION	TODAY	OUR RECOMMENDATION
Allow AI crawlers that also collect training data (GPTBot, Google-Extended, CCBot, Applebot-Extended, meta, cohere)?	Allowed	Keep allowed: StartNet gets known and cited by AI assistants most widely
Keep district and sector pages out of Google until they have real activity?	Yes (98 pages)	Keep, as Book 1 §9.3 says
Should unknown slugs such as `/vibe/foo` return a 404 status?	200 with "not found" content	Yes, return 404
Should the event Agenda and Speakers tabs be indexed?	No: they point to the edition page	Keep as is
Are recent graduates eligible for Vibathon?	"[confirm]"	StartNet decides
Consent banner on small phones covers about 50% of the first screen	Stacked buttons	Approve a shorter banner text
Which events are free, and which are paid?	"Most first events are free"	StartNet confirms per event
Should StartNet run a vibathon.in micro-site in season?	Not built	Optional (Book 1 §7.3)

15 Hosting & go-live

ITEM	DETAIL	PRIORITY
Domain and DNS access	For `startnet.in`, HTTPS certificate, and the `www` → apex redirect	P1
Hosting choice	A Node.js 18+ server (one process serves the site and the API) behind a CDN or load balancer	P1
Build machine with Chrome or Chromium	Needed for the crawlable pre-rendered pages (`npm run build`)	P1
Production settings	`NODE_ENV=production` , `PUBLIC_ORIGIN` , `CORS_ORIGINS` , `TRUST_PROXY` , `VITE_WHATSAPP_NUMBER`	P1
Staging site	A password-protected staging URL for StartNet review, kept out of Google	P2

How to send the inputs: one shared spreadsheet with a tab per section (events, programmes, figures, people, districts), plus a folder for logos, photos and legal texts. Each value can go live as soon as it arrives: no rebuild of the design is needed, only a data update and a re-run of `npm run build` .
