StartNet.

Inputs we need from *StartNet*

Everything the website, the brand book and the launch are waiting on, after the v2 redesign and the end-to-end audit. Each item says what to send, why it matters and in what format.

PREPARED
10 October 2026

REPLACES
Inputs v1 (8 Oct)

WEBSITE
startnet.in · v2

SUMMARY

What is blocking, what is waiting

The site is complete and works without these: every missing fact shows as a visible **[placeholder]** rather than an invented one. These inputs turn placeholders into real content and unblock launch.

5	150+	17	6
launch blockers open (3 of 8 done)	placeholders in event, programme, story, people and metric data	photo shots to commission	event videos missing

P1 needed before launch · P2 needed soon after launch; the page shows a placeholder until then · P3 improves quality; nothing is broken without it.

SECTION 1

Launch blockers

	WHAT WE NEED	WHY	PRIORITY
1	**WhatsApp number** for every "Chat on WhatsApp" / "Get updates on WhatsApp" link. Send the number in international format.	**Received 10 Oct: +91 98848 98206.** Live on every WhatsApp link.	DONE
2	**DNS record for x.startnet.in** (StartNet X sign-in / sign-up), or tell us the correct StartNet X address.	The domain does not resolve, so "Sign in", "Join StartNet" and StartNet X links fail.	P1
3	**Hosting details:** the production domain, the server or host, and the values for `TRUST_PROXY` and `CORS_ORIGINS`.	Needed to deploy the NestJS server with the right security headers, caching and redirects.	P1
4	**Sign-off on the brand palette**: SNX Red #EF4444 as primary, Ink #0C1719 secondary, Marigold #FBA62A and Lagoon #117780 tertiary (Brand Book v1.0, page 52).	The website already uses it; sign-off makes it official and closes the brand book.	P1
5	**Logo vector files** (SVG/AI/PDF) of the current StartNet logo.	To confirm the wordmark letterforms and produce final outlined artwork; the site draws the logo in type today.	P1
6	**Legal texts**: the two pages marked "[to be drafted by counsel]", and the link to the disclosure statement.	Legal pages cannot be invented.	P1

7	**Grievance and privacy contact**: name and email of the grievance officer, and the complaint route.	**Email received 10 Oct: nagaraj@startnet.in** (live on Contact, Governance, legal pages, StartNet X Agents). Still needed: the officer's **name** and the response time.	PART
8	**Confirm the contact emails** hello@, partners@, press@ and careers@startnet.in are live and monitored.	**Confirmed 10 Oct:** hello@, partners@, press@ and careers@startnet.in are live and monitored; published on Contact, Media and Careers. (Brand-team inboxes research@, vibe@, connect@, women@ are still marked [confirm].)	DONE

SECTION 2

Content and data

Send these as a spreadsheet or a document per area; we load them into `server/data/*.json`. Every figure needs a source, an as-at date and a confidence tag (A verified, B claimed, C estimate).

	AREA · WHAT TO SEND	WHERE IT SHOWS	PRIORITY
1	**Events (52 placeholders)**: for every upcoming edition, the dates, venue, fees, sponsors, jury, registration status; for past editions, attendance with its tag.	/events, every series and edition page, event cards on Home and brand pages	P1
2	**Programmes (34 placeholders)**: final fees or rate cards, funding source, eligibility confirmations (for example whether recent graduates are eligible), jury, terms and providers.	/programmes and every programme page	P1
3	**Metrics (22 of 51 have no value)**: founders nurtured, events run, institutions worked with, Mission 1 Lakh progress, startups launched, capital raised, pilots, brand-level counts, plus the missing as-at dates on 6 metrics.	Home stats, brand pages, Founder Ledger, Mission 1 Lakh meter	P2
4	**Founder stories (20 placeholders)**: real stories with the founder's written consent (name, company, district, outcome).	/insights/stories, story cards on brand pages	P2
5	**People (13 placeholders)**: leadership and brand-lead bios, advisory council members (with consent to be named), speakers, jury.	/about/leadership, event and programme pages	P2
6	**Signed partners and sponsors**: logos (SVG) and the signed agreement for each.	Logo walls stay empty by design until there are signed partners	P2
7	**Founder Ledger and reports**: ledger figures (5 placeholders), report files and dates (4), index scores.	/insights, Founder Ledger, reports and indices	P2
8	**Company history**: the first event and key milestones with dates.	/about timeline	P2
9	**Press releases and job openings**.	/media and /careers (templates exist; no entries yet)	P3
10	**Confirm childcare** at flagship events before it is published.	Women pages	P3

SECTION 3

Photographs to commission

The site uses 37 real StartNet photos and 39 licensed stock photos; 181 abstract slots use animated visuals. These shots replace stock and fill event pages that have no photos of their own. Rules: real Tamil Nadu, people doing the work, accurate skin tones, no AI imagery, landscape originals of at least 2400 px, a caption with event, place and month, and written consent for identifiable people.

	SHOT	REPLACES / FILLS	PRIORITY
G1	**Vibathon 2025** (K.S.R. College of Engineering, 26 Sep 2025): full-size originals; the current file is only 572 px.	Vibathon heroes, posters, story	P1
G2	**High-resolution stage photos** (the current ones are 1280 px video frames).	/about, /events, /partner, /media heroes	P1
G3	**GenAI Connect 2024**, Radisson Salem: expo floor and a panel.	GenAI Connect pages (motion today)	P2
G4	**D2C Connect 2024**, Le Méridien Coimbatore: founders at product tables, on stage.	D2C Connect pages	P2
G5–G10	**Other events**: Vibe Marketing Summit, Vibe Campus build nights, Lab-to-Market Summit, Women Founders Summit and Awards, Vibe Summit, Investors Summit.	Their event pages (motion today)	P2
G11	**Research labs**: Agentic AI, Ontology & Knowledge, Physical AI, Drug Discovery at work.	Lab pages (stock or motion today)	P2
G12	**Brand heroes**: one wide StartNet room (Home), a Women Circle, a scholar with a prototype.	Home, /women, /research heroes	P2
G13	**The Salem office**: entrance or the team at work.	/contact	P3
G14	**Leadership portraits** (M K Elango, V Nagaraj, Poonthamil): head and shoulders, plain background, with consent.	/about/leadership, /media	P1
G15–G17	**Rise Academy on a phone**, a GCC team reviewing a student pilot / partner-college graduates, the StartNet team at work.	/women, /partner/gccs, /partner/institutions, /careers	P3

Full shot descriptions: `docs/IMAGE-PLAN.md`, section 4. Drop files in `photos/originals/` and run `npm run photos`.

SECTION 4

Videos

WHAT WE NEED	WHY	PRIORITY

1	**Highlight reels** (any length; Instagram or Facebook reels are fine, uploaded to YouTube) for Vibathon 2025, Vibe Marketing Summit 2025, StartNet Vibe at TNGSS 2025, SaaS Connect 2025, and more of GenAI Connect 2024.	No public video of these exists. Once on YouTube, each is one line in `videos.js`.	P2
2	**Titles and speaker names** for the seven February 2024 session recordings (C00xx files) and the July 2023 "ChatGPT for business" clip.	They cannot be published without knowing what they are.	P3
3	**Permission** to use the LocalKart product-launch keynote by M K Elango (Sep 2023), published by the host.	It would suit the Leadership page.	P3
4	**Confirm** whether the YouTube channel @startnetresearch belongs to StartNet.	It holds a NIRF Higher Ed Summit 2024 promo.	P3

SECTION 5

Tamil

	WHAT WE NEED	WHY	PRIORITY
1	**Native Tamil review** of every Tamil string drafted during the build (UI labels, captions, the consent banner, Vibathon labels, video captions).	Machine and agent drafts are marked for review; Tamil must be written natively.	P1
2	**Tamil tagline** sign-off: "ஒவ்வொரு திறமையும் ஒரு நிறுவனர்." (comma or no comma).	Used on /ta and in the brand book.	P1
3	**Tamil body copy** for pages that are still English on /ta (most brand and event body text), and shorter Tamil event summaries for phones.	/ta pages show English marked `lang="en"` until translated; Tamil event heroes run long at 320 px.	P2

SECTION 6

Brand book

	WHAT WE NEED	WHY	PRIORITY
1	**Pantone and press CMYK** values from a print partner's press proof.	Needed before signage, stationery or merchandise is printed.	P2
2	**Tamil specimen test** on two mid-range Android phones (font sizes and Noto Sans Tamil / Anek Tamil sign-off).	Confirms Tamil readability at small sizes.	P3
3	**Vibathon wordmark** artwork, if one exists.	Vibathon is the only programme with its own wordmark.	P3
4	**Certificate signatories** and the certificate verification URL pattern in StartNet X.	Certificates carry real, named signatories only.	P3

SECTION 7

Decisions

	QUESTION	OUR RECOMMENDATION
1	Should placeholder founder stories stay live, or be hidden until real stories arrive?	Hide until real stories arrive (they are already out of the sitemap).
2	Should edition `/agenda` and `/speakers` tabs be indexed by search engines?	Index them once they have real content.
3	Should unknown URLs such as `/vibe/foo` return a true 404 status?	Yes (soft 404s hurt SEO).

4	The cookie banner covers about half of a 320 px phone screen. Approve shorter wording?	Yes: a one-line first view.
5	Are the 39 licensed stock photos acceptable until the commissioned shots arrive?	Yes, replaced slot by slot as photos arrive.

How to send: one folder per section (data as a spreadsheet, photos as original files with a one-line caption each, logos as SVG). Anything marked P1 unblocks launch; the rest can follow in any order, and the site updates as each item arrives.
